Fluenta – In-App Purchase IDs (iOS & Android)

The app uses one set of product IDs on both stores (source: `lib/core/iap/iap_product_ids.dart`). No iOS-specific IDs exist, so the Android IDs are reused as-is. IDs must match App Store Connect / Play Console exactly.

iOS bundle ID: `co.futurewatch.fluenta` | Android application ID: `co.fwglobal.fluenta`

1. Products to create (7 total)

Product ID	Type	iOS setup	Android setup	Price in app
`fluenta.premium.weekly`	Auto-renew sub	Subscription, group **fluenta.premium**	Base plan under sub **fluenta.premium** (plan ID fluentapremiumweekly)	$2.49
`fluenta.premium.monthly`	Auto-renew sub	Subscription, group fluenta.premium	Base plan fluentapremiummonthly	$6.99
`fluenta.premium.annual`	Auto-renew sub	Subscription, group fluenta.premium	Base plan fluentapremiumannual	$39.99/yr
`fluenta.premium.lifetime`	One-time	Non-Consumable IAP	One-time in-app product	$79.99
`fluenta.hearts.20`	Consumable	Consumable IAP	Managed product (consumable)	$0.99
`fluenta.hearts.60`	Consumable	Consumable IAP	Managed product (consumable)	$2.99
`fluenta.hearts.150`	Consumable	Consumable IAP	Managed product (consumable)	$6.99

Android only: `fluenta.premium` is the parent subscription product that holds the three base plans. On iOS it is just the subscription *group* name – no separate product is needed (the app also queries it on iOS; the store reports it as not found, which is harmless). Prices above are the in-app fallbacks; live store prices override them. Free-trial offers (3/7-day) are configured as store offers on the subscriptions, not as separate IDs.

2. What each ID unlocks

Product ID	Unlocks

`fluenta.premium.weekly`
`fluenta.premium.monthly`
`fluenta.premium.annual`
`fluenta.premium.lifetime`
	Pro – identical for all four; they only differ in billing period/price. The code sets a single premium flag (`setPremiumActive`). Lifetime never expires; the other three renew and can lapse.

`fluenta.hearts.20 / .60 / .150`	**+20 / +60 / +150 hearts** added to the balance. Does **not** unlock Pro. Consumable, can be bought repeatedly.

3. Free vs Pro

Feature	Free	Pro
Hearts	5 per day (+ up to 3 rewarded ads/day for 2 hearts each)	Unlimited
CEFR levels	A1 – B1	All levels incl. B2+
Roleplay scenarios	2 (order_food, small_talk)	All (adds job_interviews, at_airport, doctor_visit, business_meeting)
Streak freezes	2 per week	Unlimited
Streak repair	Not available	1 per month
Weekly progress report	No	Yes
Ads	Shown (banner/interstitial/rewarded)	Removed

Feature	Free	Pro
Offline mode	Yes	Yes (not gated)

Marketing copy on the paywall also lists unlimited AI conversation, unlimited grammar corrections, advanced pronunciation feedback and personalized work-English lessons; these strings exist in the localizations but were not verified against code gating.
